

500mm CHASSIS EXTENSION - SUITS LC79DC

If practical load carrying capability and improved dynamic handling on a dual cab vehicle is sought, a chassis extension is the solution. Benefit from significantly improved handling characteristics when heavily laden, but also ability to more practically haul large items. Whether it be large cargo, a heavy service body, or towing duties – Multidrive Technology have you covered.

The 500mm chassis extension to suit the 11/2012+ Toyota LC79 dual cab has been carefully developed with vehicle-specific requirements in mind. Full testing has been undertaken via third-party engineering signatories prior to product approval and release to market. Each chassis extended vehicle is fit-for-purpose and backed by quality componentry.

Multidrive Technology offer both pre-registration fitment under Second Stage Manufacture (SSM) compliance approval, or post-registration fitment via Vehicle Assessment Signatory Scheme (VASS) Engineering Certificate. Assurance is guaranteed that such a significant modification is properly applied against every vehicle.

Our chassis extension range is fully complimented by additional modifications including rear diff track correction and GVM upgrades. We may assist also with fitment of a tray or incorporate other required accessories.
