

300mm CHASSIS EXTENSION - SUITS RANGER PX3

If practical load carrying capability and improved dynamic handling is sought, a chassis extension is the solution. Benefit from significantly improved handling characteristics when heavily laden, but also ability to more practically haul large items. Whether it be large cargo, a heavy service body, or towing duties – Multidrive Technology have you covered.

The 300mm chassis extension to suit the 08/2018+ Ford Ranger PX3 (all cab variants) has been carefully developed with vehicle-specific requirements in mind. Full testing has been undertaken via third-party engineering signatories prior to product approval and release to market. Each chassis extended vehicle is fit-for-purpose and backed by quality componentry.

Multidrive Technology offer both pre-registration fitment under Second Stage Manufacture (SSM) compliance approval, or post-registration fitment via Vehicle Assessment Signatory Scheme (VASS) Engineering Certificate. Assurance is guaranteed that such a significant modification is properly applied against every vehicle.

Our chassis extensions are fully complimented by our range of GVM upgrade options. We may assist also with fitment of a tray or incorporate other required accessories.
