

FIRE SPECIFICATION CAB CHASSIS - SUITS RANGER PX3 SC

Multidrive Technology's fire specification cab-chassis fit-out is a custom packaged solution developed wholly for utilisation on Ford Ranger PX3 single cab fire vehicles. There is no compromise on fit, form, or total function. Whatever the appliance – ultra light tanker, quick attack, or general service fire vehicle – Multidrive Technology have all bases covered!

Maximise payload capacity with a 3510kg GVM upgrade (+310kg). Sure-up the plastic OEM fuel tank with a larger steel replacement tank which prevents issues with ember lodgement and optimally tracks fuel usage via the OEM dash fuel gauge! Multiple additional options are also available for fitment – see the components list.

Multidrive Technology offer both pre-registration fitment under Second Stage Manufacture (SSM) compliance approval, or post-registration fitment via Vehicle Assessment Signatory Scheme (VASS) Engineering Certificate. Assurance is guaranteed that such significant modifications are expertly applied against every vehicle.

Our fire specification cab-chassis package provides an all-inclusive base vehicle setup. Following the addition of a third-party service body and communications of choice, each fleet vehicle is ready for the field.
