

BCDC1225D DUAL BATTERY SYSTEM – SUITS LC70S

Multidrive Technology's BCDC1225D dual battery system for the Toyota LC70 Series is a premium solution to power vehicle accessory requirements and charge auxiliary vehicle batteries. Whether you're running radios, lighting, or keeping the fridge cool, Multidrive Technology will keep you charged up!

The BCDC1225D dual battery system is designed using premium Redarc DC-DC charging technology. This ensures the auxiliary battery is charged in the most efficient manner during vehicle operation. This system offers provision for solar input if required (not included in this install). For the ultimate dual battery setup, this product may also be combined with Multidrive Technology's SBI212 dual battery system.

Multidrive Technology offer on-vehicle fitment for this system via our dedicated workshop facilities. Assurance is guaranteed that this dual battery kit is expertly applied against every vehicle. Be confident during work or remote adventures that power will always be at hand.

Our range of LC70 Series dual battery systems are fully complimented by our GVM upgrades, chassis extensions, and rear track correction options. We may assist also with fitment of trays or incorporate other required accessories.
