

BCDC1225D + SBI212 DUAL BATTERY SYSTEM – SUITS LC70S

Multidrive Technology's BCDC1225D + SBI212 dual battery system for the Toyota LC70 Series is the ultimate solution to power vehicle accessory requirements and charge auxiliary vehicle batteries. Whether you're running radios, lighting, or keeping the fridge cool, Multidrive Technology will keep you charged up!

The BCDC1225D + SBI212 dual battery system is designed using premium Redarc DC-DC charging technology and isolator. This ensures the auxiliary battery is charged in the most efficient manner during vehicle operation. This system offers provision for solar input if required (not included in this install). The battery isolator protects the start battery from excessive discharge, while allowing the auxiliary battery to power accessories. This system also allows linking of the start and auxiliary batteries via OEM style dashboard mounted switch in case of high-power or auxiliary starting requirements.

Multidrive Technology offer on-vehicle fitment for this system via our dedicated workshop facilities. Assurance is guaranteed that this dual battery kit is expertly applied against every vehicle. Be confident during work or remote adventures that power will always be at hand.

Our range of LC70 Series dual battery systems are fully complimented by our GVM upgrades, chassis extensions, and rear track correction options. We may assist also with fitment of trays or incorporate other required accessories.

MODEL APPLICABILITY

Landcruiser 76 (Wagon)
Landcruiser 78 (Troopy)
Landcruiser 79 (Dual and Single Cab)
From 10/2016+

WEIGHT

32.6kg* total system
*approx. only (includes battery)

KEY FEATURES

- Under-bonnet auxiliary battery
- 200A battery isolator in addition to circuit breakers
- Battery linking functionality via in-cab auxiliary start button
- Multi-stage DC-DC charging profile
- Provision for solar input (not included in installation)
- Grille-mounted charger improves cooling
- Premium automotive cabling and connectors

COMPONENTS

- Century N70ZM MP12 600CCA battery
- Redarc BCDC1225D battery charger
- Redarc SBI212 battery isolator
- Twin 30A auto-reset circuit breakers
- Twin 200A megafuses
- 3mm powder-coated steel auxiliary battery cradle
- 2mm powder-coated steel charger and circuit breaker bracket
- OEM style back-lit auxiliary start switch
- Complete wiring kit
- Complete fastener kit

WARRANTY

Retail	1 year / 50,000km
Fleet	1 year / 50,000km
