

ALUMINIUM FLEET TRAY – SUITS S/C MODELS

Our aluminium fleet tray is expertly engineered to meet the rigorous demands of payload management and service body handling. Crafted from extruded aluminum, these trays offer a lightweight yet robust solution, ensuring maximum reliability for all your needs.

Our range of aluminium trays is available for most popular single cab fleet vehicles including the Ford Ranger, Toyota Hilux, and Toyota Land Cruiser 79 Series. Thanks to their T-slot extrusion frames, our trays feature versatile mounting options. This allows for endless customization with various accessories, such as rake and shovel holders, storage boxes, wash bays, and undertray bins. Available with customizable drop-down gate configurations, your tray needs are future proofed with modular extrusion design.

Fully designed, tested, and assembled in Australia, our trays have undergone rigorous shake testing to simulate operating requirements, ensuring dependable performance.

Our aluminium fleet trays are fully complimented by our range of GVM upgrades, as well as Toyota LC79 track correction options, spare wheel relocation kit, and fire spec fuel tanks. We may also assist with fitment of dual batteries or incorporate other required accessories.

To find out more, please visit our website or contact our team to tailor to your requirements.

MODEL APPLICABILITY

Toyota Landcruiser 79 Series (Single Cab)
Toyota Hilux 8Gen (Single Cab)
