

ALUMINIUM FLEET TRAY – SUITS D/C MODELS

If practical payload management or ancillary service body handling is required, a proven base platform is a must. Multidrive Technology's range of aluminum fleet trays are founded on the demands of reliability, and robustness. Through careful design a lightweight yet heavy duty tray shall exceed your specific requirements.

A range of aluminium trays is available to suit most popular fleet dual cab vehicles – Landcruiser 79 Series, Ranger, and Hilux. Expertly designed and not just proven, but refined for decades over, these trays are fit-for-purpose. Locally manufactured from high quality Australian steel and aluminum, you are assured of ultimate performance when it matters most.

Multidrive Technology offer a range of accessories to cater for many specific requirements. Concealed toolbox / slip-on reinforced mounting, shovel and rake hoe holders, and retro-reflective tape / branding are just some of the standard options. With many choices for drop down gate configuration, a compatible service body solution is but an order away.

Our aluminium fleet trays are fully complimented by our range of GVM upgrades, and rear track correction options (Landcruiser 79 Series only). We may assist also with fitment of dual batteries or incorporate other required accessories
