

DUAL ARMREST KIT – SUITS LC70S

Multidrive Technology's dual armrest kit is developed specifically for the Toyota Landcruiser 70 Series. With minimal fuss, driver and passenger comfort is greatly enhanced via these premium adjustable armrests. When it comes to improving your driving experience, Multidrive Technology have you covered!

Due to its commercial-vehicle origins, even the top-spec GXL variant is not equipped with driver and front passenger seat armrests from factory. Multidrive Technology, in conjunction with NSV Australia, have developed precisely a fully engineered solution via 3D scanning, CAD modelling, and third-party engineer certified physical testing.

Multidrive Technology offer the product in either kit-form or via in-house fitment at our dedicated workshop facility. This comprehensive kit guarantees that the modification is expertly applied against every vehicle.

Our dual armrest kit is a great additional when fitted along side our engineered vehicle modifications or range of other accessories.
