

CHILD RESTRAINT ANCHOR KIT - SUITS LC79DC

Multidrive Technology's Child Restraint Anchor (CRA) for the Toyota LC79 dual cab is developed specifically for the Toyota LC79 dual cab vehicle. With minimal fuss, this kit allows three top-tethered child seats to be installed in the second row. When it comes to the safety of your children, Multidrive Technology have you covered!

Due to its commercial-vehicle origins, even the top-spec LC79 dual cab GXL variant is not equipped with OEM child restraint points. Multidrive Technology have developed precisely a fully engineered solution via 3D scanning, CAD modelling, and verified by destructive physical testing. The CRA kit is fully ADR-approved via third-party consulting engineer tests. Our dedicated production facilities ensure quality conformance on every kit.

Multidrive Technology offer kit-form sale or post-registration fitment via Vehicle Assessment Signatory Scheme (VASS) Engineering Certificate. Assurance is guaranteed that such critical safety-based modification is expertly applied against every vehicle.

Our CRA kit for the Toyota LC79 dual cab is fully complimented by additional modifications including GVM upgrades and chassis extensions. We may assist also with fitment of a tray or incorporate other required accessories.
