

300MM CHASSIS EXTENSION - SUITS RANGER SUPER DUTY 2025+

The Ford Ranger Super Duty has hit the ground running in the Australian 4x4 fleet and offroad scene and the only thing that we could find to improve is the one thing Multidrive knows best, loads and weight distribution. Whether your super duty is a heavy-duty weekend warrior or a work week hero, a 300mm chassis extension will help distribute the super duty's massive payload, give you room to move with large tray space and will improve your towing experience.

Developed precisely via 3D CAD modelling, FEA verification, and driven by 30+ years of refinement, this chassis extension is fully approved via independent third-party consulting engineers. Our dedicated production facilities ensure quality conformance on every conversion and a lengthy warranty period to guarantee confidence.

Multidrive Technology offer both pre-registration fitment under Second Stage Manufacture (SSM) compliance approval, or post-registration fitment via Vehicle Assessment Signatory Scheme (VASS) Engineering Certificate. Assurance is guaranteed that such a significant modification is properly applied against every vehicle.
